BLAZE is a highly sensitive Day/Night IR camera suitable for both indoor and outdoor application with IP67 weatherproof design. With an ultra sensitive CCD sensor and 48 long range (850nm) infrared LEDs, the unit can view up to 90 feet in complete darkness.

Automatic image conversion from Color to BW at 5 lux, removes the color to signal noises for a clearer picture, and enhances the resolution up to 560 TVL at night.

They have a smart self-focus adjustment technology that precisely corrects the normally distorted focus under IR illumination.

Built-in IR LED protection technology intelligently prevents IR LEDs from burning out and extends the performance of IR LEDs for an extremely long time. The unit has passed the IP67 testing and guarantees interior moisture, condensation-free picture in any harsh weather condition.
